

WHY JOIN THE EngineeringCAS™ COMMUNITY?

Liaison International has been working with several engineering societies to develop a Centralized Application Service (CAS™) specifically for engineering programs.

These societies have been invaluable in the development of EngineeringCAS, a centralized online portal through which prospective students will learn about graduate engineering programs and apply to multiple programs of interest by submitting just one set of transcripts, test scores and letters of recommendation.

Fully customizable and branded software lets schools define their unique workflows and program-requirements, and retain total control of all admission decisions.

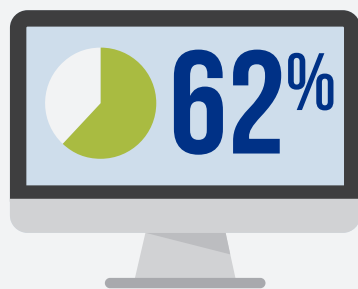

A CAS can easily integrate into existing data systems.

There is no cost to schools for participation in EngineeringCAS.

62% of master's-level students surveyed would have preferred to apply through a CAS.

Source: Participants in Existing CASs

More than half of master's-level students surveyed reported that they applied to more than one program.

Source: Participants in Existing CASs

75%

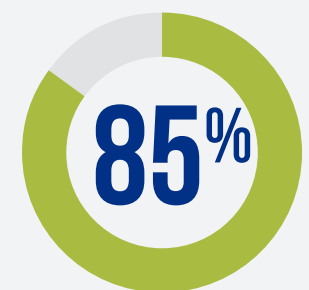

Decrease in application processing time from initial application to acceptance.

Source: Weill Cornell Graduate Medical School

#1 FEATURE

The #1 feature of importance to potential students is the convenience of having program data and applications in a central site.

Source: Participants in Existing CASs

85% of programs surveyed expressed a desire to increase their applicant pool!

Source: Participants in Existing CASs

69%

Reduction in time to final decision.

Source: University of Tennessee Health Science Center

Reduced the time from when a student submits the application through a CAS to when it has been verified and available for program review.

SOFTWARE:

Cloud-based software with no implementation costs

HARDWARE:

None required

STAFFING:

No additional personnel required

TRAINING:

Free training
